

Z8350 平台操作系统安装指导（2 个 U 盘装系统）

Video Guide:: <https://youtu.be/y2qB8kcVHq4>

Download Files:: <https://drive.google.com/open?id=1S6cDgg9UPukEvjjJBxO2FeTQSyWwXu42>

Step1: Making the installation disks

1. The first USB disk is used to make the Boot Disk. Insert the USB disk into the computer. Click "This PC" on the desktop, then right-click the USB disk drive, and select [Format].

2. In the pop-up format interface, select [FAT32] for the file system, change the label to WINPE, then click [Start]. The format has to be [FAT32].

3. Find the following 5 files you downloaded from Google Drive and copy them to the Boot Disk.

4. The second USB disk makes the System Disk. When formatting the USB disk, the file system is selected as [NTFS] format, and the label is changed to WINPE, then click [Start].

5. Find the other 2 files you downloaded as following and copy them to the System Disk.

名称	修改日期	类型	大小
images	2017/6/14 13:45	文件夹	
Scripts	2017/6/14 13:48	文件夹	

Step 2: Use the 2 USB disks to install a new operating system

1. 把制作好的 2 个 U 盘插到要装系统的电脑上，开机过程中反复点按键盘的【F5】设置启动盘，选择 U 盘启动 1.Insert the two U-disk that you have made into the computer on which you want to install the system. During the boot process, repeatedly press the keyboard's [F5] to set the boot disk, and select the U disk to boot.

2. When the following screen appears, unplug the first USB disk--Boot Disk from the computer. (If you do not remove the Boot Disk, you will enter the system directly.)

3. The system will be installed automatically and will be shown as below. It takes some time here, pls be patient.

2. Double-click [Cleanup test Tool] on the desktop, the computer will clear the files on the desktop and then automatically shut down and restart, you can enter the computer Welcome User Setup stage, according to the guiding interface to complete the installation of the operating system, then enter User Mode interface.
